## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to path finding in VPN tunneling, classified in class 370, subclass 428.
  - II. Claims 12-16, drawn to adding a new router to a VPN and network configuration, classified in class 370, subclass 254.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions from group I and II are distinct from one another because group I and II are both methods; however, group I determines VPN tunnel's addresses while group II involves VPN configuration.
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as forwarding a packet to a destination in any existing network without any router being added. Similarly, adding a router to a VPN network in group II does not require sending any packet to the network. See MPEP § 806.05(d).

Art Unit: 2667

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
